OVERVIEW

Martin Exterior Linear Pro Graze QUAD lights are compact, LED-based architectural fixtures, available in 1 and 4 foot lengths making them easier to integrate into architectural elements. Delivering uniform light distribution at a 15 degree beam angle, full color mixing and including a dedicated color temperature control channel, which accurately follows the black body curve, they are ideal for illuminating textured surfaces, high walls and linear structures in permanent indoor and outdoor locations, emphasizing architectural features in stadiums, bridges, tunnels and other applications.

KEY MESSAGES

EASE OF INSTALLATION

The slim design and low weight makes them easier to integrate into architectural elements discreetly and with less structural requirements. They have flexible change-of-beam angles for late design changes and on-site adjustments. A smart mounting plate design offers a variety of standard or custom bracket solutions.

SOPHISTICATED COLOR CONTROL

These QUAD color fixtures include logic RGB control of the RGBW engine, making it easier to mix colors when the white color is automatically calculated. Factory calibration of colors offers superior consistency and user-selectable default color temperature with the ability to set a favorite default color temperature. Fine segment control is also included for more organic and subtle color transitions.

SMART INFRASTRUCTURE

Fixtures are DMX-controllable and easy to install due to their integrated universal power supply. They can also be daisy-chained using a combined power and data connector, which enables long fixture runs and more simple infrastructures.

PREMIXED COLORS WITH COLOR BOOST

QUAD color LEDs deliver an enhanced visual appearance with homogenous color mixing and high lumen output of mixed colors. A color boosting feature is also included for full powered illumination of a single color or mixed colors, making them up to three times brighter than comparable fixtures yet boasting lower total power consumption.

EFFICIENT OPERATION

With more than 50 lm/W, Exterior Linear Pro QUAD fixtures are highly efficient. Multiple power modes (12W/10W/5W, including ASHRAE compliance) can be set via Remote Device Management (RDM) to reduce power consumption as needed.

GRANULAR LIGHTING CONTROL

An integrated 6-inch (15 cm) segment mode enables more granular lighting control for organic and subtle looks.
